### R Markdown

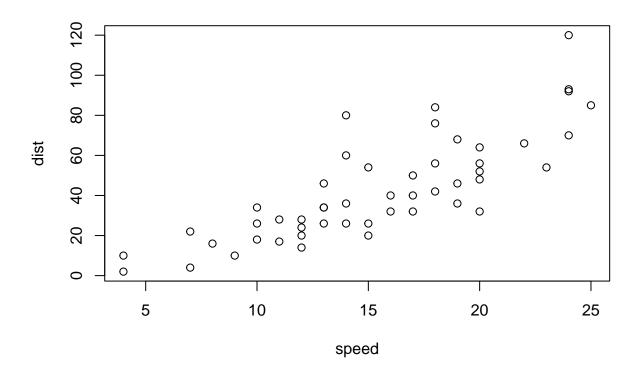

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##
         speed
                          dist
##
            : 4.0
                     {\tt Min.}
                             : 2.00
    Min.
    1st Qu.:12.0
                     1st Qu.: 26.00
##
    Median:15.0
                     Median : 36.00
##
    Mean
            :15.4
                     Mean
                             : 42.98
    3rd Qu.:19.0
                     3rd Qu.: 56.00
##
    Max.
            :25.0
                             :120.00
                     Max.
```

#### plot(cars)

## Hello World code trial

```
print("Hello World");
```

## [1] "Hello World"

## **Including Plots**

You can also embed plots, for example:

Note that the  $\mbox{echo} = \mbox{FALSE}$  parameter was added to the code chunk to prevent printing of the R code that generated the plot.
